

## ***NJP-1200C Automatic Capsule Filling Machine***

NJP-1200C Capsule Filling Machine can fill powder, granules and other materials into hollow capsules.

### **Basic devices:**

- a. PLC control system integrate with Simense touch screen, PLC
- b. One set change part for capsule size: (00#-5#), Liquid ring vacuum pump
- c. Dust collector
- d. Sensor for machine stop when no powder, no capsule and door open

### **Technical Parameters:**

Model No.	NJP-1200C
Stable Output	If for running 8 hours per day, about 1000 pcs per minute
No. of bores	9
Suitable for Capsule	000#,00#,0#, 1#, 2#, 3#, 4#,5#
Power	380/220V 50Hz
Overall Weight	900KG
Machine Dimension	1185×1170×2000mm
Filling error	±2.5% - ±3.5%
Accuracy	+ 1% Depending upon the consistency, uniformity & bulk density of powder under the controlled level of humidity.
