

DXD-50-2000Y Automatic Liquid (paste State) Packing Machine

DXD-50-2000Y series liquid or semi fluid packaging machine, completely controlled by computer program, the production process can be completed automatically, such as: bag making, measurement, filling, sealing, printing batch number, production date, easy tearing, cutting or conjoined bag, calculation and so on. The plunger pump volume method is especially suitable for packing easy to draw and drip, such as shampoo and other similar materials Sealing form: three side sealing, four side sealing, pillow bag and jam can be customized. Packaging material: paper / polyethylene polyester / aluminum foil / polyethylene nylon / polyethylene tea filter paper Matching device: coding machine (ribbon type, ink wheel type); Computer control device

Features

- Back seal, three side seal and four side seal
- Packaging operation data and adjustment can be displayed directly on the display screen
- Assembly of photoelectric control device to ensure the integrity of packaging bag pattern
- Automatic bag making, measuring, filling, sealing, cutting, counting and printing batch number
- The shell and material contact parts are made of stainless steel
