

Horizontal Bag-feeding Sauce Packaging Machine YS-SP160

YS-SP160 horizontal bag-feeding sauce packaging machine is a highly efficient packaging equipment designed for the food, pharmaceutical, chemical and cosmetic industries. It can automatically complete the metering and packaging process of granules, powders, liquids, sauces and other materials, and supports the use of pre-made bags such as aluminum plating and plastic film for packaging.

The YS-SP160 horizontal bag-feeding sauce packaging machine has been widely used in many industries and has been well received by customers due to its efficient performance, reliable quality and flexible and diverse function settings. If you are looking for a packaging solution that can both improve production efficiency and ensure product quality, then the YS-SP160 will be your ideal choice.

Specifications

Model	YS-SP160
