

## *High speed bin bottle handler BCPL100-02*

High-speed bottle sorter is one of the equipment for plastic bottle filling lines. Because of its fast bottle feeding speed, it can be matched with various high speed production lines, or it can supply bottles to two bottling lines simultaneously through a separate conveyor belt.

### **Features:**

- This machine is made by the latest technology and advanced process, with fast and stable bottle feeding speed.
- For different sizes of bottles, you only need to change the bottle handling turntable and adjust the bottle conveying path.
- This machine has bottle storage bin, which can store 1000 pieces of 40-200ML plastic bottles.
- The bottle feeding and conveying mechanism can automatically start or stop bottle feeding according to the number of bottles in the bin through the detection of photoelectric sensor. It is more stable and efficient.

### **Technical Parameters:**

Model	BCPL100-02
Production Capacity	10~100/minutes
Power	0.5KW
Power supply	220/110V 50/60Hz
Machine weight	500kg
Overall dimensions	L:1500mm W:1000mm H:1400mm
