

GF32-32-3 Aluminum Foil Filling Machine for Dairy Drinks

This aluminum foil filling machine integrates bottom filling, capping and electric sealing. This aluminum foil filling machine is suitable for filling and sealing PP or PE bottles of dairy vegetable protein beverage and fruit juice products.

This aluminum foil filling machine is a specialized type of packaging machinery designed to accurately measure and dispense a product—often liquid, semi-liquid, or viscous—into containers that are then hermetically sealed with a lidstock made of aluminum foil or foil laminates. The sealing process uses heat and pressure to create a tamper-evident, airtight seal that protects the product from contamination, oxidation, and leakage.

Parameter

Model	Production capacity	Applicable bottle shape	Installed capacity(KW)	Dimensions/meter
24-24-2	10000BPH/H	Bottle diameter \varnothing 40- \varnothing 20	12KW	2.3*1.7*2.3
32-32-3	20000BPH/H	Bottle height 80-160	14KW	2.5*1.8*2.3
40-40-3	25000BPH/H	Bottle mouth \varnothing 25- \varnothing 35	17KW	2.9*2.2*2.3
50-50-4	32000BPH/H	Material PP/PE	20KW	3.2*2.5*2.3
