

JGS-200 Automatic Locking Machine

Features

Automatic lid opening and closing, easy to operate

The bottle enters in a straight line and is continuously capped, which is efficient and fast (the capping speed is 2-3 times faster than typical intermittent capping)

Friction type rotary cover, rotary transmission cover, no vibration, no noise

Fault automatic shutdown and uncovered automatic shutdown system, safer

Technical Parameter

- Production speed: 50-200 bottles/minute
- Bottle specifications: diameter 30-120mm
- Total power of motor: 1000W
- Voltage; 220V 50-60HZ
- Dimensions: 1800 * 850 * 1850mm
- Weight: 720kg
