

FWM500B Cut and Flow-Pack Machine

FWM500B Cut and Flow-pack is applicable to cutting and packaging chewing gum, bubble gum, soft candy or hard candy. Small compact machine which consists of two sets of vertical rope forming wheels for either round, square, oblong & flat section profile pieces. The pieces are automatically cut with nipper knives, transported along a transport conveyor as a flow-pack, giving speeds of up to 500 packs per minute.

Function:

- Full servo operated wrapper. Three servo motors drive the conveyor feeding, film feeding and bag sealing
- Bafu's sealing technology for superior seal integrity and package quality
- High accuracy photoelectric tracking system. Adopt high quality Encoder and the first bag will be tracked
- Cutting and horizontal packing together
- High-speed automatic splice
- High precision, high tightness, high stability

Standard Specifications:

- Speed: up to 500 packs/min
- Bag Length: 20-40/40-80/80-160mm
- Bag width: 12-20mm (Dia.8-13mm)
- Bag Height: 3-18mm
- Shape: Cylindrical, Rectangle, Square and so on
- Voltage: 220V
- Power: 2.2KW
- Overall size: 2250x900x1550mm
- Weight: 1000kg
- Wrapping Material: CPP/PET CPP/BOPP
