

SED-140P Pharmaceutical Automatic Capsule Blister Card Packing Machine

Blister Packing Machine, The machine is new product which is improved based on customer's requirements. It's suitable for packaging of all kinds of liquid and solid in medium & small pharmaceutical factory, health medicine factory, hospital preparation lab, food industry, electronic industry, hardware industry, etc.

It can protect the material from steam or dust, improve product packing degree, and increase the additional value. The machine is used to produce small quality and many kinds of products.

Advantages

- It has been improved the inner design turret, and imports beeline bearings for each machine from Japan directly, so that it can be sure a longer usage-life and precision of machine.
- The working station cam runs under the good lubricating condition, and maintains the inner lubrication of cam slot to a full extent, increasing the pressure pulverization oil pump, thus extends the operation life of the spare parts.
- It is controlled by the computer, has a stepless timing with the frequency-conversion, the numeral showing makes an easy operation and clear appearance.
- Adopt Plane Spring for filling powder, this type spring can afford TWO BILLION TIMES Pressing, but never changed overall dimension. So it makes the Weight of Powder filling in an accuracy number.
- Automatic Capsule Switch operated by Touch Screen avoid Dangerous Accident happens when open the switch by hand into the working station.
- Our quality machine use Tanshing Cam box, in automatic capsule filling machine area Honest Business is the most important, Because Customers can't see the mechanical parts inside. So our company can promise we use the real type but never "labeling type".

- The multi-bore dosing brings a precision dosage (it is controlled around $\pm 0.75\%$); the good capsule applicability makes a higher capsule qualified rate ($\geq 99\%$). It can be filled with the Chinese traditional medicine and the Western medicine.
- Add the extra function of capsule control switch. (Control the capsule outside of the machine; it is more safely and quickly).
- Add the click-moving control system, makes an easier operation and clearness.

Product Parameters

Cutting Speed	15-40 times/minute
Capacity	4800 sheets/hour
Max forming area and depth	130*110*26(mm)
Standard scope range	20-110mm(According to customer's requirement)
Standard blister size	80*57mm (According to customer's requirement)
Max. size	can be made is 115*80(range)mm
Compressed air	0.6-0.8Mpa
