

SED-BFG-B Semi Automatic Auger Powder Filling Machine

This filler is for powder and small granular material dosing such as pharmaceutical powder, instant drink powder, milk powder, spice, salt, white sugar, chemical powder etc. Filling into pre-made bag or solid container with high speed and accuracy, can separately or work together with other packer.

Advantages of Powder Filling Machine

- 1) The material is in contact with 304 stainless steel, which meets the requirements of GMP.
- 2) PLC and touch screen control system, all Chinese and English interface, easy to operate;
- 3) Screw-type weighing measurement, 3-level speed feeding, filling volume and filling speed can be adjusted arbitrarily, with high precision.
- 4) The number of packages can be automatically displayed, and the workload of the machine can be easily counted

Product Parameters

Metering method	Weighing type
Application	Powder
Hopper volume	50L
Material	The contact material part is 304 stainless steel
Filling weight	1000-5000g
Weighing range	1-5000g
Filling accuracy	±0.5%
Filling speed	5-10bags/min
Power supply	AC380V 50-60HZ
Power	1.8kw
Compressed Air	6kg/m ² 0.3m ³ /min
Weight	150kg
Dimensions	690*1060*2000mm
