

PL2000IV

High Speed Automatic Unscrambler

Introduction:

The machine is the latest generation product of high speed bottle-sorting machine in China, it doesn't need bottle-sorting mould. It is applied for bottlesorting with all shapes of bottles, and it's the bottlesorting machine with quickest speed in China at present. The mainframe has an electronic timing, which can protect the bottles from falling down, it also has a photoelectric controlling installation, the product conforms to the requirements of GMP completely.

Main Technical Specifications	
model	PI2000IV
output	60-120bottles/min(depends on bottles samples)
Power supply	AC110/220/240V 50/60HZ single phases AC200/380/415V 50/60HZ three phases
Power	0.55kw
Dimension(W*D*H)	2430*1120*1360 mm
