

Automatic Tube Filling Sealing Machine HGF-50

Machine information

1. Automatic tube filling sealing machine is with mass production, suitable for filling colloid material into metal flexible tubes or compounding (plastic) tubes with lid and sealing then.
2. Automatic hand cream tube filling sealing machine used in daily chemical, pharmacy, and food stuff and so on.
3. It has such features as simple structure, low cost, single station filling and sealing, small volume, applicable to small lot production and multi-variety production.
4. Automatic hand cream tube filling sealing machine is equipped with automatic packing machine, can form a product line for filling, sealing and packing. It also can be used solely.

Technical parameter:

Type:	HGF-50
Filling capacity(ml):	20-500ml
Hose diameter(mm):	10-50
Hose length(mm):	50-220mm
Quantity accuracy of filling:	±1%
Production capacity:	50 pcs/min
Power (KW):	4.2kw
Weight:	850kg
Overall dimension(mm):	2000*950*1900mm
