

Granule Pouch Packing Machine VT-75-2HW

Makers and sellers of granule products can seal and pack their product very easily with the help of a granule pouch packing machine. The machine output and its sealing and packing capacity depend on the type of product for which the machine is used and the film used. The machine has a long service life. It can fill and pack pouches of very less weight up to one gram and slightly more weight up to two hundred and fifty grams to one kilogram. Powder products can be packed easily with the machine. Vista techno pack machines give you on sale the granule pouch packing machine for all your pouch sealing and packing needs. The machine has an automatic function that helps in packing several pouches together in one minute. The seal is made at the center. The machine seals the pouches with the help of heat. Made of stainless steel, it can pack pouches of laminate material that can be sealed with heat.

Product Details:

Model	VT-75-2HW
Brand	VISTA
Power Consumption	1-2 HP
Machine Capacity	40ppm
Driven Type	Electric
Automatic Grade	Automatic
Voltage(V)	415v
