

ZHJ-80/120/150 Automatic Cartoning Machine

Automatic Cartoning Machine is suitable for packing blisters, tubes ampoules and other related objects into boxes intermittently. The highest speed can up to 150 boxes/min. It has advantage of high packing efficiency and good quality. This machine can fold leafiest, open box, insert blister into box, emboss batch number and close box automatically. It adopts inverter to adjust speed, human machine interface to operate, PLC to control and photoelectric to monitor and control each station automatically, so that once something unexpected happen, it will stop and display the reasons automatically, which can solve the troubles in time. This machine can be used separately and also can be linked together machine to be a Production line.

Note: this machine can also equip with hot melt glue device to do hot melt glues sealing for box.
