

Automatic Two Nozzles Filling Machine for Sticky Products with Tank MTFM-1100A

Application:

- It's to fill both liquid and sticky products
- Suitable for Small and Middle Filling Projects
- It's widely used to Fill Juice, Jam, Drinks, Cosmetics, Cream and similar

Spec and Feature:

- Work independently or Connect to Line, suitable for Small and Middle filling projects
- Simple Operation with Touch screen human-computer interface
- Automatic filling by PLC
- Filling volume controlled by Cylinder with Solenoid Valve with a wide filling volume range
- With Tank for Viscosity products
- Nozzle height adjustable for different sized bottles
- Photoelectric Sensors control the feeding, filling and moving action

Technical Parameters:

Power	220V 50Hz, 0.5KW
Air Supply	0.5Mpa
Filling Volume	200-4000ML
Production Capacity	1200-1800BPH
Filling Precision	1%
Weight	200KGs
Machine Size	2050*1100*1550mm ³
