

## *SJ-1000 Automatic Liquid Packaging Machine*

### **Performance characteristics:**

1. The machine can automatically complete the processes of bag making, quantification, filling, sealing, slitting, counting, coding, etc., and can be customized according to customer requirements.
2. Robotic pull bag, stable performance, easy to adjust.
3. The overall contact material parts and casing are made of 304 stainless steel, which meets the food and drug hygiene permit standards. Can be equipped with UV sterilization.
4. The metering method adopts the plunger volume pump filling and metering, which is easy to adjust and accurate.
5. Advanced design to ensure that the machine is suitable for different industries in the use of adjustment, operation, maintenance are very convenient. It can be used together with various automatic metering equipment at home and abroad.

### **Scope of application:**

Packaging materials: milk, soy sauce, vinegar, yellow wine and various liquids.

Packaging material: heat sealable plastic film such as polyethylene/PE.
