

Horizontal Flow Wrapper PSA-250N/PSA-250W

There are 2 models of Horizontal Flow Wrappers. One is PSA-250N for non-shrinkable film, another one is PSA-250W for shrink film; it must work with heat tunnel.

Features:

- Quick packaging speed creates high production efficiency. It adopts former with special design to have good H-type sealing line.
- Film saving design matches environmental friendly issue & save cost with stable packaging.
- Film former is designed to fit product with pushing tab of conveyor, so it can have very fitted package for good look & saving cost.
- Traditional mechanical driving system reduces electronic parts & minimize belts using to have easy maintenance in future.
- Additional accessories are possible to be installed such as Thermo-transferring Printer, Press Sensitive Labeler, Card Feeder...etc. Also, Auto Products Feeding or Discharging system are also adoptable to integrate full packaging line.
- It can work with shrinkable POF or non-shrinkable BOPP, CPP or laminated film.
- The special design former can have good H-type sealing line with perfect shrinking result.
- Film saving design matches environmental friendly issue & save cost.

Specification:

- Packaging Speed: 80 pack/min
- Sealing Type: H-Type
- Power Requirement: 3.5KW 220V 1ph
- Dimension: 4720mm x 850mm x 1650mm
- Weight: 1000kg
- Horse Power: 2HP x 1
- Heat: 400W x 2 / 300W x 4
- Frame: SUS Main Body.
- Film Feeding Roller: 500mm auto centralization device.
- Special Features: Sealing Safe System, Wasting Trim Winding Unit, Former X1, Film Tension Control System, No Film No Work Mechanism, Stop Work for No Product Feeding & HMI Control System, Mercury electric condition for TD sealer, Optional accessories can be designed by exact working requirement.
