

## *Non-woven Fabric Packing Machine for Powder*

This machine is suitable for automatic packaging of loose, non-sticky and granular materials such as medicine powder, feed, charcoal, tea, activated charcoal, laundry powder and desiccant, etc. in pharmaceutical, food, daily chemical, pesticide, plastic products and special industries.

### **Features**

1. The machine is suitable for automatic packing of desiccant. It is integrated into feed hopper, the feeder, automatic cold seal cutting part and the control box. Operation is convenient, safety and durability.
2. PLC control and touch screen display panel.
3. Good electronic color control system, automatically and accurately track the cursor on the packaging film, so that the bag can get a complete and beautiful icon.
4. Besides single bag cutting at one time, we can choose two bags or multiple bags cutting too. The automatic packing machine can automatically complete the work of metering, bag making, filling, sealing, cutting, counting and printing in the packing process.
5. Stepper motor control, the system has high accuracy, no need to adjust other components can change the length of the bag, and accurate.
6. Adopts self weight motor paper pressing and paper feeding structure, the bag making is smooth and good.
7. The seal form is ultrasonic cold seal, suitable for non-woven fabric packaging materials, sealing is neat and firm.

**Technical parameters:**

Measuring range	50-200g
Filling type	Single measuring cup
Control Style	PLC system+English touch display screen
Film width	100-300mm
Bag length	20-150mm
Bag width	50-140mm
Appearance	Stainless steel 304, SS201 of machine frame
Bag type	back seal bag,side sealed bag
Speed	20-30bags/min
Power	3phase 4wire 3.5KW,50Hz
Air consumption	0.6Mpa 0.3m <sup>3</sup> /min
Weight	Around 500kg
Dimension	L850*W1250*H1900 mm
