

Aluminum Foil Sealing Machine GHL-0200

GHL-0200 Automatic electromagnetic induction aluminum foil sealing machine. The sealing machine is used in the ideal sealing and packaging equipment for medicine, pesticide, food, cosmetics, lubricating oil and other industries.

The aluminum foil automatic sealing machine utilizes the principle of electromagnetic induction to instantly generate high heat of the aluminum foil on the bottle mouth, and then fuses it on the bottle mouth to achieve the function of sealing. Has a good moisture, mildew, anti-counterfeiting effect, to extend the life cycle of the item. The material of the container may be polyethylene (PE), polypropylene (PP), polyester (PET), polystyrene (PS), ABS, glass, etc., and cannot be used for metal bottles and caps.

Technical Parameters:

- Rated voltage: AC220V, 50/60HZ
- Equipment weight: gross weight: 38KG, net weight: 34KG
- Maximum power: 1300W
- Cooling method: air cooling
- Sealing diameter: 15-80mm (optional)
- Sealing height: 20-180mm
- Conveyor speed: 0-12.5 m / min
- Sealing speed: 0-200 bottles / min
- Packing size: 970*515*475mm
- Host size: 805*310*330mm
- Appearance: Stainless steel
