

## *JTJ-A Household Small Semi-Automatic Capsule Filling Machine*

The JTJ-A Capsule-Filling Machine is a new type of medicine filling machine with novel structure and attractive appearance.

Under both electrical and pneumatic control and equipped with an automatic electronic counter and computer-controlled speed-adjusting device, the machine can accomplish the positioning, separation and locking etc. of capsules. In place of manual capsule-filling, it can reduce labor intensity and raise productivity. Its filling amounts are accurate and up to sanitary standards for pharmaceuticals.

The machine consists of capsule-feeding, U-turning and separating mechanism, material medicine-filling mechanism, locking device, electronic speed varying and adjusting mechanism, electrical and pneumatic control system protection device as well as accessories such as vacuum pump and air pump.

China machine-made capsules or the imported are applicable to this machine, with which the finished product qualification rate can be above 98%.

**Specifications:**

Productivity	1—25,000 capsules/h
Applicable capsules	0#, 1#, 2#, 3# machine-made standard capsules
Filled medicine type	Not adhesive or wet powders and small granules
Total power	2.12Kw
Air pressure	0.03m <sup>3</sup> /min, 0.7MPa
Vacuum pump	evacuating rate: 40m <sup>3</sup> /h
External dimensions (mm)	1500x680x1600 (L*W*H)
Packing Size(mm)	1640X720X1700 (L*W*H)
Weight	330Kg
