

NJYF-600C Automatic Hard Capsule Liquid Filling & Sealing Production Line

NJYF-600C automatic hard capsule liquid filling & sealing machine is designed to process capsules containing solution, suspension micro emulsion or hot melts, which helps realize the potential of High Potency Active Pharmaceutical Ingredients or poorly soluble compounds. Sealing is designed to ensure that the liquid pharmaceutical material does not leak out through the connection between the capsule lid and body. It is completely manufactured according to CE and GMP rules.

NJYF-600C has become very popular among pharmaceutical industries all over the world, for trial research, batch productions and for full production utilization. At an output of up to 36,000 capsules per hour, the versatile capsule filling & sealing machine does not only convince because of its precision and speed, but also through its easy operational handling.

Technical Data

Model	NJYF-600C
Output	36000pcs/h
Suitable for	solution, suspension, microemulsion or hot melt
Segment bores	12
Capsule sizes	00-4# gelatin, vegetal capsule
Environmental requirement	RT approx. 20°C/68°F; humidity 40%--55%
Connected voltage	Three-phase 380V/220V, 50Hz
Total power	6KW
Weight	1200KG
Dimension (W×D×H)	960*1100*1800MM
Discrepancy rate	±2%
