

Multifunctional Electronic Counting Machine

The Multifunctional Electronic Counting Machine is highly compatible, and can count and bottle various solid preparations or solid particles, such as tablets (including shaped tablets), capsules, soft capsules (transparent and opaque), pills, and the like.

Features:

The special structure of the discharge port of the Multifunctional Electronic Counting Machine prevents clogging of the drug, and the vial can be quickly bottled (optional).

High degree of intelligence: with various alarm and control functions, such as no bottle count, automatic check failure.

Auxiliary function of the Multifunctional Electronic Counting Machine:

- The photoelectric sensor can automatically check if there is no bottle and stop automatically.
- The Multifunctional Electronic Counting Machine is easy to operate: intelligent design allows for a variety of operational data, Set according to requirements. 10 sets of setting parameters can be stored for use.
- The Multifunctional Electronic Counting Machine is easy to maintain: after simple training, workers can easily operate. Easily remove, clean and replace parts without any tools.
- Sealed and dustproof: A dust box can be provided to reduce dust pollution. (optional)

Technical Parameter:

Applicable bottle shape	round、square plastic bottle
Filling material	Φ0~5#capsule、soft capsule、Φ5.5~12compressed tablet、special-shaped tablet、sugarcoated tablet、Φ3~12pill
Production capacity	40~120 bottles per minute(It depends on the bottle size、filling quantity and the tablet size)
The setting range of bottling volume	1—9999
Power supply	AC220V 50Hz 0.6kw
Accuracy rate	>99.5%(higher than the industrial standard)
Air pressure	0.6Mpa
Overall dimension	2200×1400×1680mm
Weight	550kg
