

## AC-400A Blister Forming Machine

This machine can be used in hardware, tools, batteries, stationery, daily necessities, cosmetics, auto parts and various industries.

### Feature

1. Mechanical drive, servo motor traction, reasonable structure, simple operation;
2. Stainless steel cover shell, beautiful appearance, convenient cleaning, improve product grade;
3. PLC control system, frequency conversion speed regulation, reduce noise, improve machine operation stability;
4. Photoelectric control, automatic detection, automatic output count, automatic fault reminder.

### Main Parameter

Item	Parameter
Speed	15-20 time/min
Stroke range	30mm-220mm
Max forming area	200mm*380mm
Max forming depth	40mm
Heating power	3kw
Total power	8kw
Air pressure	0.5-0.8mpa
Packaging material (PVC) (PET)	Thickness 0.2mm-0.5mm内
Weight	1000kg
Machine Dimension	L2728* W 1060 * H1614 mm
