

ZHTW-180M Screw Capping Machine

Zhonghuan Company offers a variety of screw capping machines (rotary capping machines) for a number of different industries and products. The high speed bottle capping heads provide for repeatable and reliable cap application of the screw caps. The rotary cappers use presorted caps that are picked up and secured and then placed on the containers.

Features

1. This ZHTW-180M screw capping machine has adjustable height of conveyor belt.
2. It achieves the speeds of up to 60 caps per minute.
3. This rotary capping machine has adjustable height for various bottles.
4. Rotary capper is made of stainless steel, and manufactured by aluminum alloy anodizing.
5. Control system adopts Mitsubishi PLC program controller.
6. It is equipped with human-computer interface.
