

Automatic Online Twist Capping Machine PC-300

Capping for plastic cap of various bottles, jars, atomizer bottle, etc
Widely used in cosmetic, drinks, chemical, medical, food industry etc, which can highly improve productivity and product quality.

Features

1. Frequency control, stable and safe.
2. Capping system up & down, which was control by motor, it is easy to adjust capping height to be suitable for different bottle height.
3. Easy setting, good appearance and practical functions
4. High capping speed. Compared with normal claw-shaped capping machines, its capping speed is increased by 3-4 times. Besides, it can effectively prevent hair-shaped on bottle and damaging caps, and so on
5. Suitable for bottles with various specifications by adjusting the timing belt distance, turning wheel distance and machine height, without changing the components
6. Suitable for round, square, oblate, or flat bottles with various specifications
7. Can be used separately or used with other equipment such as calculating machine, sealing machine and labeling machine, becoming an automatic mechanical packaging line
8. Applicable to the capping of cosmetic, medicine and drink bottle caps

Parameter Date

Model	PC-300
Application	Pump cap, needle cap & standard screw cap
Production	2000-6000B/Hour
Power	220V 50Hz 1.1KW
Cap diameter	20-40mm
Bottle height	80-350mm
Twisting force	5-20N.m
Weight	400Kg
Dimension	3000*1000*1700mm
