

QGF-60 Barreled Production Line

QGF-60 barreled production line is specially for producing 3-gallon and 5-gallon barreled drinking water. Integrating with washing, filling and sealing, it is the ideal manufacturing equipment of mineral water, distilled water and purified water. Adopting excellent stainless steel, it is corrosion resistant and easy to clean. The main original electric parts are of SIEMENS and OMRON; the airflow system adopts imported Air TAC products. With the advantages of compact structure, small space occupation, high, stable and reliable efficiency and high automation, it is mechanical, electric and gas full-automatic barreled equipment.

Technical parametrs:

Filling Heads	1
Filling Volume	3 , 5gallon
Barrel Size	φ30x420 , φ76x490
Production Capacity	60-120b/h
Machine Power	2.8kw
Power Supply	With a gross power of 3.68KW, it is only 2KW during normal hours as the power units are started intermittently.
Air Supply	The pressure is 0.45-0.6Mpa and the gas consumption is 0.17 - 0.22m ³ /h.
