

CFR-BL Rotary Soft Bottle Filling Sealing Machine

The machine is suitable for filling and sealing for the products made of LDPE, such as ice loll, (grenade, corn, banana, rabbit etc) toys jelly.

It can be widely applied to dairy products, juice, drinks and other liquid products.

1. Adopts to the suction filling manner to ensure high speed and to save labor.
2. Designs the feedback seal through to protect the liquid material exposure to the outside then ensure the hygienic standard and improve the product quality.
3. Sealing adopt the mechanical pressing manner (adjustable the pressing force), the sealing quality is reliable.

Technical parameters:

Filling heads	40
Sealing heads	16
Diameter of the heads	Φ6、Φ8、毫米（根据客户要求而定） (according to the customers' requirements)
Filling volume	30—200毫升(ml)
Dimension of the tube	直径≤Φ50毫米，长度≤300毫米 diameter≤Φ50mm,length≤300mm
output	6000-9600 条/小时（按制品结构决定） 6000-9600pcs/h (the exact output relies on the structure of the tube)
