

DLL158 High Speed Auto AL/AL Packing Machine

This machine adopts variable frequency speed regulating, vibration blanking mechanism, material quantity photoelectric monitoring device and automatic filling. Such production processes and assemblies as heat-sealing, line cutting, batch No. printing, cutting and automatic counting, etc. have been automatically finished. It is suitable for packing tablets, capsules and mini electronic components and solid articles in the medical industry and can reach good tightness performance and damp proof effect.

Main Technical Specifications:

- Production Capacity: 3-3.6ten thousands per hour/hour
- Punching Frequency: 20-60times/min
- Compressed Air: 0.5MPa≥0.1M3/Min(Self-prepared)
- Main Motor Power: 0.55Kw
- Overall Size: 1200x850x1700mm
- Weight: 420kg
