

SP-17 Inner and Outer Tea Bag Packing Machine

This machine is a new type of heat-sealing, multi-functional automatic tea bag beverage packaging equipment. The main feature of the machine is that the inner and outer bags are molded once, avoiding direct contact between the hands and materials and improving the efficiency. The inner bag is a filter paper, which can be automatically taped and the outer bag is a composite paper. The greatest advantage is that: the labeling and the outer bag can be photo electrically positioned. The packaging capacity, inner bag, outer bag, and label can be adjusted arbitrarily. The inner and outer bag sizes can be adjusted according to the user's different needs, so as to achieve the best The effect of packaging improves the appearance of the product and enhances the value of the product.

Application scope:

This machine is suitable for disposable packing of inner and outer bags of small particles such as tea, herbal tea and health tea.

Packaging Materials:

Paper / plastic, plastic / plastic, plastic / aluminum / plastic, paper / aluminum / plastic, filter cotton paper, cotton, label paper

Performance parameters:

Model	SP-17
Film width	100-250 (mm)
Voltage	220V
Power	2.1 (Kw)
Measurement range	2-10ML
Heating power	1.2 (Kw)
Motor Power	0.55 (Kw)
Speed	30-60 bag
Weight	500kg
Dimension	2000*1250*750 (mm)
