

Hot Sauce Cups Filling Machine SD-PJZN series

This machine is a specially design using for one standard hot sauce cups massive production. It combines the function of thermoforming the cups from the plastic roll films, dosing the cups with hot sauce, heat-sealing the cups with top-lid films, and then cutting the cups into single and out-letting as for final product. This compaction design guarantee its extremely high producing capacity and packing material saving, and most economic choice for your hot sauce cup production.

Features:

- Multiple functions combined in one machine, saves the precious space and material cost for you.
- Fully automatic processing, the machine adapts PLC and HMI control, all the operating and the status are on the panel.
- Copper made heating plate, guarantee the perfect sealing effect on the top-lid with good appearance.
- Used film collecting structure will collect the waste edges and film, easy for you to recycle them and save cost.
- Piston pump sauce filling structure makes the filling volume precise and quick.

Technical Parameters:

Model		SD-PJZN series
Application		Ketchup, yogurt, fruit jam, sauce
Measuring method		Piston pumps
Capacity		8000-24000pcs/hr.
Filling volume		200ml
Packing material	Cups film roll	PC, PET, PP, PS
Applicable	Top-lid film roll	PE, PS, PP, Nylon, Alu etc.
Power consumption	Transmission	6kw
	Heating and thermoforming	18kw
Power		AC 3N-50HZ 380V 26kw
Air resource		0.6-0.8MPA
Dimension (L*W*H)		About 8500mm×950mm×2200mm
Weight		4300 kg
