

## Automatic Carton Packing Machine CPM-series

This machine is mainly used for carton in beer, beverage, bottled water, medical treatment, food and other bottled (canned) production line. Packing with cardboard saves about 1/5 of the cost of packaging materials compared with traditional packaging methods.

### Features:

1. Machine adopt convergence system and touch screen to control every function of operation, detecting error and display automatically. Convenient for maintenance and efficient.
2. Well-known brand Servo motor and self lubricate lower abrasion chain. Working stably and efficient.
3. Adopt known hot melt equipment, easy to operation, durable. Packing effect is artistic and easy for store and transportation.
4. Liner feeding bottles and feeding cardboard system, advanced electric collocation and technology. Configuration easy for operation.
5. With the combination of man-machine interface, various control functions are improved, and parameters of various packaging specifications are directly inputted, modified and stored.

### Technical Parameters:

Type	CPM-20	CPM-35	CPM-45	CPM-60
Molding Carton Dimension (mm)	550<L+W+H<1000	550<L+W+H<1000	550<L+W+H<1000	550<L+W+H<1000
Bottle Height (mm)	110-340	110-340	110-340	110-340
Bottle Diameter (mm)	Φ50-180	Φ50-180	Φ50-180	Φ50-180
Total Weight (KG)	4500	5000	7000	11000

Output	20	35	45	60
(PPM)				
Dimension	8870*3000*1820	8870*3000*1820	12380*1960*1906	12380*3820*2628
