

Sakos Machinery

L-type Automatic Shrink Wrapper

Instruction

1. Cooling device of automatic shrink wrapper: cooling the finished product, it is convenient to transfer the product to the required location without breaking or loosening.
2. Fault alarm device: prompt the operator to remove the fault in time.
3. PLC program control system: automatic control.
4. Main electrical control box: centralized control of machine control.

Technical Parameters

Various heat shrinkable films such as: PE, PP, PVC, POF

Packaging film width: ≤ 600 mm

Equipment dimensions: 5970 × 3510 × 1940 (mm)

Maximum packing size: 400 × 300 × 350 (height) mm

Heat sealing knife length: 700mm

Shrinking temperature: 130-260 °C

Maximum production speed: 600 bags / hour
