

## *Doypack Filling Packaging Machines - DPM 60*

Our firm's last product, DPM60 doypack Machine, is presented to stretchy packaging sector by our research-development engineers. It is a fast machine that makes filling through making package from bobbin. It can present wide range of packaging of liquid, powder, granule types of food and cleaning goods. Machine can present advantages in the innovative packaging. With the DPM60 Doypack Machine, it is possible to take product outputs with zipper and nozzle capped.

### **Technical Details:**

Capacity	40-60 pieces
The minimum size of the packages	70*40*100 (L*W*H)
The maximum size of the packages	190*55*300 (L*W*H)
Filling Station number	Depending on the production of simultaneous production packaging, 2 or 4
Folio Bobin Size	750*çap800 mm
Automation Control	PLC system
Air Consumption	min. 6 bar - 300 L / min.
Electricity consumption	12 kW - 7 kW
The area of settlement	1,8*7/2,4 m
