

Case/carton erector machine

Grepack takes clients as the god trying best to satisfy all kinds of their requirements to manufacture the case erector machine, carton erector machine.

Description:

Features:

- 1) Full-automatically Carton Erector
- 2) Vertical storage: the cartons can be added in line at any time without stopping the machine.
- 3) Folding and taping the bottom cover during delivery and without stopping. Finish adsorbing, forming, folding bottom cover and taping bottom in 3 seconds. More productive and more efficient. More productive and more efficient.
- 4) Suitable for different carton size and it can be manually adjust in 2 minutes.
- 5) Adopted international advanced technology, with imported parts and electrical components, this machine has a stable performance and long life-using.
- 6) Equipped with PLC system, saving labor and easy to operate.

Technical Parameter:

Power	220V or 380V, 50 or 60HZ, 300w (we design it according to customer's requirement)
Carton Size (mm)	200 to 450 in length, 150 to 400 in width, 100 to 350 in height
Air Consumption	450NL per minute
Carton Storage Quantity	100pcs (1000mm)
Erecting Speed	8 to 12pcs per minute
Applicable tape Width	48mm, 60mm, 72mm
Machine Dimension	L1900 x W1900 x H1450
Machine Weight	500kgs
