

PTSC-6L Automatic Capping Machine with Cap Sorter

The press and capping machine PAC-1P is used to press caps and screw caps after filling machine. It is suitable for most kinds of screw caps. Widely used for cosmetics/medical/chemical/food industry. And it can be linked with filling machine and labeling machine in line.

Features:

1. Use sensor switch and pneumatic components to ensure high quality machine and stable features
2. Automatic cap screw by machine, high speed, suitable for most kinds of bottles
3. Multi-functional machine, easy to be adjust and meet high accuracy.

Technical Specification:

Press speed	≤6000 bottles/hour
Capping speed	≤700 bottles/hour
Cap type	Screw cap,pump cap
Voltage	~110V,50Hz
Air pressure	0.6-0.8Mpa
Power	300W
Gas consumption	100L/Min
Weight	150KGS
