

DTY-200 Automatic Paste - Liquid Packaging Machine

The machine is a kind of liquid sachet packing machine, it is usually used for packing shampoo, sauce, oil, grease, cosmetics and other liquid products, be poured into the bag, can fit a variety of viscosity products. The machine have fast, accurate, economic and practical advantages.

Features

- Bag Liquid Packing;
- Packing speed higher;
- Easy to operation;
- The machine have fast, accurate, economic and practical advantages;
- Packaging range is widely ;
- High quantity.

Technical Parameters:

Packaging capacity	40-60 bags / min
Measuring range	1.0-50mm
Bag dimensions	length 60-180mm, width 50-120mm
Power supply voltage	380V three-phase four-wire system
Power consumption	1620 (heated 180 × 4) W
Dimensions	Width 650 × depth 750 × high-1588mm
Net Weight	170kg
