

ML-20 Steam Label Shrinking Tunnel

The steam label shrinking tunnel is widely used in food and beverage industry, Chemical industry, pharmaceuticals industry etc.

Application:

The steam shrinking tunnel is widely used in food and beverage industry, Chemical industry, pharmaceuticals industry etc.

Features:

In case of different and irregular round bottles, square bottles and flat bottles etc, the new-style steam shrinking oven is easy to adjust and maintain. It has an even shrinking. The distribution of low-pressure steam drum and spouting way of steam are uniform and designed with seamless tube. The nozzle is divided to be adjustable three segments and the height, position and steam output of every segment can be adjusted respectively so as to gain the perfect shrinking effect. The whole machine is made of stainless steel with heat preservation, which not only saves energy, but also complies with the international safety standard. The stainless steel defrosting tray collects condense water. The whole machine adopts the water-proof design with the convenience of operation and maintenance.

Technical Specification:

Model	ML-20
Input Power Supply of Blower	Φ1 220VAC 1.1KW
Input Power Supply of Steam Generator	380V/50Hz
Working Pressure	≤0.1Mpa
Transporting Speed	0-35m/min
Steam Consumption	10-20Kg/h
Steam length	2000mm
Weight	230Kg
Size of Oven Body	L2300×W400×H450
