

FR-1010 Vertical Bag Continuous Heat Sealing Machine

FR-1010 series plastic packaging machine suitable for sealing, adopts electronic constant temperature control and stepless speed transmission mechanism, automatic and continuous sealing materials of plastic film, According to the need to also can configure creasing printed wheel and counting device.

Features:

1. Adopt stepless speed control and electronic thermostat control device transmission mechanism.
2. Its sealing length is not restricted, high efficiency, reliable sealing quality, reasonable structure, easy to operate and so on.
3. Suitable for sealing packaging of various bags, and can connect with kinds of packaging lines.
4. Need to be heated before use.

Parameter:

Model	FR-1010
Max. Speed	0-21m/min
Sealing Width	6-10mm
Temperature	0-300°C
Max. Film Thicknes	0.4mm
Max. Loading	50kg
Sealing Height	400-800mm
Machine Size	1500x555x1350
Machine Weight	88kg
