

WP-GF20 Multi-head Filling - Ultrasonic Welding Machine

Feature

- The machine can be equipped the pump with different amount and different filling range according to the product.
- The machine includes three functions: filling and ultrasonic welding and cutting.
- The equipment has the functions of no product no filling, no product no sealing and no cutting.

Scope Of Application

- Applied for the industrial packing of pharmaceutical, daily chemical, chemical and etc.

Technical Parameters

Model	WP-GF20
Material	Plunger, Pump cavity sleeve (alumina zirconia)
Discharge volume per revolution	0~6ml
Drive way	Electric+pneumatic input
Air pressure	0.4~0.6Mpa
Production efficiency	≤1200 pcs/hour
Filling precision	±≤0.5%
Maximum discharge capacity	According to the filling range
Powersupply	AC220V 50/60HZ 350W
Weight	135kg
Size of host machine	1200×600×650(mm)
