

BZ001 Flat screw powder filling and packaging machine

The flat screw powder packaging machine is an advanced equipment specially used for packaging powdered materials. It adopts a unique flat screw metering method, which can accurately and efficiently complete the quantitative packaging of powdered materials. It is widely used in many industries such as food, medicine, chemical industry, daily chemical industry, etc. The materials that can be packaged are chili powder, milk powder, seasoning powder, laundry detergent, coffee powder, flour, etc.

Technical Parameters

Product Name	PLC Professional Flat Screw Packaging Machine
Bag width	Less than or equal to 200MM
Packaging speed	25-30(PCS/MIN)
Gross Weight	240KG
Packaging range	110-300/300-1000/300-3000G
Dimensions	106*80*201CM
power	900W
Configuration	Touch screen, back seal, stepper motor
