

SF-60BDP Automatic Zipper Pouch Small Parts Hardware Bagging Machine

The bagging machine is suitable for packaging food, daily necessities, and agricultural products, such as biscuits, cookies, dried fruits, towels, tableware, socks, gloves, accessories, hats, data cables, toys, bearings, door handles, etc.

Features

1. The machine can automatically complete a series of processes such as material conveying, bag taking bag opening, feeding, and sealing.
2. It is equipped with multiple sets of infrared detection sensors to achieve no bag opening without material and automatic shutdown without bag.
3. The packaging specifications of the product can be changed by adjustment without replacing accessories.
4. The intelligent PLC control system is adopted, and the whole machine operates more stably.
5. The whole machine is made of stainless steel, with a long service life and easy cleaning and maintenance.
