

## *A910SI Front Labeling System with Booklet Applicator*

The system is designed to attach pre-folded booklet on the bottle after the labelling process. Based on our popular A900 series labeling machine design, we combined both labeling and booklet/leaflet applicator on one cabinet. Leaflet can be self-adhesive leaflet or hot melt glue to apply. With rotary booklet pick and place station and bulk supply booklet/leaflet conveyor, our applicator can reach 150 BPM max. Labeling machine can provide options such as side labeling, 3 panels labeling on square bottle or round bottle labeling wrap around with booklet applicator.

### Technical Parameters

| Model   | A910SI                                 |
|---|--|
| Name :  | Front Labeling System with Side-serter |
| Capacity :  | 150ppm                                 |
