

## CG-6 Linear 6-wheel Screw Capping Machine

This machine is the Linear automatic screw capping machine, It can automatically lift the cap in the screw capping process, automatic hanging cap, automatic screw capping process.

Due to the use of bottle clamping belt clamping bottle, synchronous operation hanging cap screw cap, running will not fall down the bottle.

This machine has the advantages of simple structure, good stability, no spare parts are needed when replacing specifications, only adjustment can be made.

It is suitable for screw cap sealing of cylindrical bottle, rectangular flat bottle, and special-shaped bottle in the food, pharmaceutical, cosmetics, daily chemical, pesticide, and chemical industry.

### Machine parameters

Model	CG-6
Bottle Diameter	30-150 mm
Bottle Height	50-300 (mm)
Bottle Cap Diameter	20-80mm (Can Be Customized)
Cap Height	10-60mm
Production Speed	< 120 Bottles/Min
Voltage	220V 50/60Hz
Power	1.5KW
Drive Mode	Variable Frequency Speed Motor
