

## *SD-YGF-98 Oral Liquid Filling Sealing Machine*

The SD-YGF-98 oral liquid filling sealing machine is a kind of filling close-over machine that is mainly used for the filling and closing-over productions oral-taken liquid, biology preparation liquid and so on. It adopts the vat-hanging circumrotating style, and can complete such procedures as the bottle-out automatically. This equipment can be used independently or connected with the completely auto-produce line.

### **Characteristics:**

1. This equipment Uses 316L, 304 stainless steel as materials that can meet the GMP requirements.
2. The machinery use vat body of piston style that can ensure measure accuracy.
3. The equipment is automatically that it will fill and close over there is a bottle and stop working if there is no bottle.

### **Technical Parameters:**

Producing Ability	10000-15000 bottle/hour
Applicable Specs	5-30ml
Filling Precision	$\leq \pm 0.5\%$
Rolling Eligibility Rate	$\geq 99\%$
Power	1.5KW 380V 50HZ
