

DZP-400E Rotary Pad Packing Machine

The DZP-400E full-automatic rotary pad packaging machine is mainly used in the pharmaceutical and food industries, such as aluminum-plastic plate, BFS, biscuits, soap, etc. It has the functions of moisture-proof, dust-proof and light-proof, and can be connected with the aluminum-plastic packaging machine and the shrink packaging machine.

Features and functions

1. Double-frequency conversion motor control, bag length is set and cut.
2. Application of world-renowned electrical components, PLC control, and human-machine interface.
3. Precise temperature setting, suitable for all types of packaging materials, improves the quality of sealing.
4. The high-sensitive photoelectric eye tracks the color scale, making the sealing and cutting position more accurate.
5. With positioning stop function, no knife sticking, no film.
6. An automatic dosing device for the dosing board, which can be suitable for many types of specifications.

Technical parameters

Model	DZP-400E
Efficiency	30-150 (packings/min)
Package size	L(70-200)×W(30-150)×H(5-65)mm
Maximum film width	400mm
Power supply capacity	AC 220V/50Hz, 3.0Kw
Equipment weight	800kg
Overall dimensions	3430x800x1700 mm (standard machine)
