

ZL420 Automatic VFFS Packaging Machine For Small Granular Product

This unit machine is special design for packing various granule products like bean, rice, sugar, salt, grain and so on. Adopt the volumetric cup as dosing machine. Speed is fast and stable. The whole machine unit can reach the function of bag making, product weighing, filling, bag sealing and output. With date coding and bag counting which improve the automation. This machine is very popular in Modern small and middle factory.

Features

- High-speed capabilities up to 80 packs per min
- Adjustable capacity from 50-250ml; 250-500ml, 500-1000ml is optional
- Accuracy 0.2 to 2g
- Omron controls as standard
- User-friendly interface
- Film track by photo-electric eye & encoder
- Servo driven for film transport
- Stainless steel systems
- Small footprint, Compact, robust and long-life construction
- Customized to meet your production, package style and economic requirements

Technical parameters

Model	ZL420
Measuring range	100-500g
Measurement accuracy	±1%
Bag Type	Pillow bag, Gusseted bag/Flat bottom bag
Operation Mode	Intermittent
Speed	Up to 60 bags/min
Dimension	1480x1020x2560mm (L x W x H)
Weight	700KG
