

GYJ-4/8/12/16 Linear Type Daily Chemical Product Filling Machine

Linear type daily chemical product filling machine is suitable for filling viscous, inviscid and corrosive liquid. The daily chemical filling machine is widely applied in plant oil, chemical liquid, and daily chemical industry. The daily chemical filling machine adopts linear type filling, electromechanical&instrucmental intergration controlling. It's simple and rapid for changing the varieties with unique design and superior capability. it's appearance accords with the international machinery concept.

Germany SIEMENS PLC and touch screen control make it intelligentize protection function. Vacuum anti-dropping device ensures no leaking situation in production. Electric adjusting for volume system, frequency control and photoelectric detecting system (Germany TURCK brand) are applied in this machine.

Parameter

Model	GYJ-4	GYJ-8	GYJ-12	GYJ-16
Filling valves	4	8	12	16
Filling volume	500ml-5L			
Voltage	380V/50HZ			
Capacity	700-800	800-2000	1500-2000	2000-3000
Power (KW)	1.0	1.5	1.5	1.5
Air consumption(m ³ /min)	0.8	1.2	1.6	1.8
Air pressure (MPA)	0.55-0.8			
Size (mm)	1800×1400× 2200	2000×1500×2300	2200×1500×2300	2400×1500×2300
Weight(KG)	1400	1800	2200	2500
