

## ***MIC-35B Auto Shrink Wrapping Machine***

In today's fast-paced manufacturing industry, reliable and efficient shrink wrapping technology is essential for product protection and presentation. MIC Machinery introduces the MIC-35B Auto Shrink Wrapping Machine, designed for high-speed shrink wrapping at 100-120NL/min. This shrink wrap machine is ideal for businesses looking to improve packaging efficiency, reduce labor costs, and enhance product durability.

### **Key Features of the MIC-35B Auto Shrink Wrapping Machine**

The MIC-35B shrink packing machine incorporates advanced automation and high-speed performance to meet industrial packaging demands. Its key features include:

1. Automatic Shrink Wrapping System – Fully automated operation for increased production efficiency.
2. High-Speed Performance – Capable of handling 100-120NL per minute, making it ideal for high-volume production lines.
3. Strong and Secure Sealing – Ensures tight and durable shrink wrapping to protect products from dust, moisture, and external damage.
4. Energy-Efficient Heating System – Optimized for low power consumption while maintaining consistent shrink wrapping quality.
5. Versatile Packaging Compatibility – Suitable for bottled beverages, food products, pharmaceuticals, cosmetics, and industrial goods.
6. Compact and Durable Design – Built with high-quality materials for long-lasting performance while minimizing floor space usage.

## Advantages of the MIC-35B Shrink Wrap Machine

### 1. High-Speed and Reliable Performance

With the ability to wrap 100-120NL per minute, this shrink packing machine is designed for high-speed, continuous operation, increasing productivity and efficiency.

### 2. Superior Product Protection

The auto shrink wrapping machine provides airtight and tamper-resistant sealing, protecting products from external contaminants, moisture, and damage.

### 3. Cost-Effective Packaging Solution

By utilizing efficient shrink film technology, the MIC-35B shrink wrap machine minimizes material waste and reduces overall packaging costs.

### 4. Professional and Attractive Packaging

This shrink wrapping machine ensures a smooth and clear shrink wrap finish, enhancing the presentation and shelf appeal of products.

### 5. Easy Operation and Maintenance

Designed with user-friendly controls and minimal maintenance requirements, this auto shrink wrapping machine is perfect for seamless integration into existing production lines.

## Parameter

Dimensions (standard)	12000*1530*2500
Shrink film material	PE
Heat shrink furnace temperature	160 - 260°
Equipment power	40KW
Equipment weight	4100kg
Shrink channel size	2500*650*450
Shrink film thickness	0.03-0.15mm
Gas consumption	100-120NL/min
Voltage requirements	380V/50-60HZ
Conveying height	950-1000mm
