

Automatic Biscuit Sandwich Machine Biscuit Cookie Packing Machine Bakery Machinery JY-ZB6010

The machine is suitable for sorting, counting and conveying regular cylindrical objects such as wafer stick, finger biscuits, molars, egg roll, straws, pencils, heat capacity sticks, etc.

Specification

1. The system enables intelligent control of the entire machine through real-time interactive operation between the touch screen and embedded PLC. Equipped with product menu configuration function, allowing convenient and rapid product adjustments.
2. The high-precision and high-sensitivity SICK photoelectric sensor tracking system ensures precise control.
3. The system integrates multiple automated functions including automatic tray uploading, automatic counting and tray feed for products (e.g. finger biscuits/egg rolls), automatic alignment then automatic package process.

Major Parameters of the Equipment

- * Packing speed: 50-40 bags/min
- * Finished Bag Size: 50-1000mm
- * Voltage: 220/380V 50HZ
- * Total Power: 3.5KW
- * Dimensions: 4400mm*2300mm*1600mm
- * Net Weight: 1000kg
