

JG-S-120Y Duck Billed Lid Desktop Locking Machine

Features

This model is a desktop semi-automatic duckbill cover locking machine.

Suitable for locking covers of pump heads, duckbill heads, round caps, and other products.

Compact, lightweight, and space saving, practical, sturdy, and easy to operate. Adjusting the height of the bottle to be low does not require the use of tools.

The torque setting of the lock cover is easy and highly reliable.

Suitable for a small variety of product lock covers.
