

SED-ZSJ Automatic Milk Powder Filling And Packaging Machine Of Small And Medium Bags

This machine adopts full servo motor drive and PLC control. The product has complete functions and can make mold according to user's requirements. It has fast speed and stable performance.

Applicable to loose, non-adhesive powder materials in the pharmaceutical, food, daily chemical, pesticide and other industries, and automatic packaging of small and medium bags with measurement requirements.

Such as: flour, coffee powder, starch, milk powder, various powders, chemical powders, etc. Since this machine is multi-column multi-channel, it is economical and efficient, and it is chosen by most users.

Feature

Suitable for automatic packing of non-viscous, loose powdery products in the pharmaceutical, food, chemical and other industries, change filling device, also can pack granular or liquid and other kinds of products.

Product parameters

Material	Stainless Steel
Capacity	1500-3000BPH
diameter	65-110mm
Motor power	2.2KW
Packing speed	30-60 times/min
Voltage:	220V/380V
Air pressure	0.7mpa
Weight:	1200KG
Size:	1700*1150*1920mm(L*W*H)
